

Fertility Order Review

Featuring Web-Based
Video Call

allianceRx
Walgreens Pharmacy

Our Fertility Order Review (FOR) program helps you prepare to self-administer fertility medications. This service gives you direct access — at no additional cost — to an experienced fertility nurse who can provide you with compassionate support for your specific needs.

How FOR Works

The day your first medication order arrives, a fertility nurse will call you to help you:

- Review the contents of your order
- Understand the purpose of each item and how to store the medication
- Access our online guides for administering self-injections, medication information and fertility education
- Stay aware of expiration dates and set up refill reminders
- Answer any medication questions you may have

FOR Video Connected Care Program

As part of the FOR program, AllianceRx Walgreens Pharmacy offers another appointment using web-based video conferencing. This way you can communicate with a fertility nurse face-to-face from the comfort of your home or office. You can get additional educational resources and support in this video call.

Trusted Fertility Care for Over 30 Years

AllianceRx Walgreens Pharmacy has an expert understanding of the fertility process. We know that timing and personalized treatment are key. Rest assured we are committed to supporting you throughout your journey to have a family. We offer:

- Access to pharmacists — even on holidays — with telephone support 24/7
- Insurance verification coordinators who help manage and maximize your fertility benefits
- Free overnight tracked shipping* with discreet insulated packaging, so medications that require special handling arrive safely
- Interactive guides (our Medication Guide and Injection Training Guide are also available in Spanish)

*Sunday delivery not available

What do patients like best about our FOR Video Connected Care Program?

“Offered a **private setting** to ask questions...”

“It was **interactive**.”

“...**invested** in our care despite having never met us.”

“You can have technology but you need some **knowledgeable professional** who can answer questions...”

“...made me feel **assured** and confident about my next step.”

“I feel much more **confident** starting our meds next week...”
